User Guide for Connecting to the University of Cyprus' wireless network **ucywifi**.

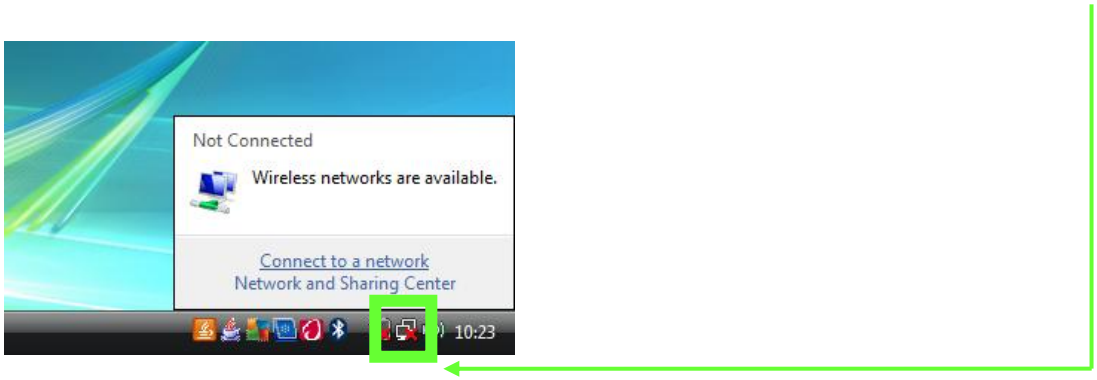
Operating System: **Windows Vista**

March 2011

CONNECTING TO UCYWIFI WIRELESS NETWORK: WINDOWS VISTA

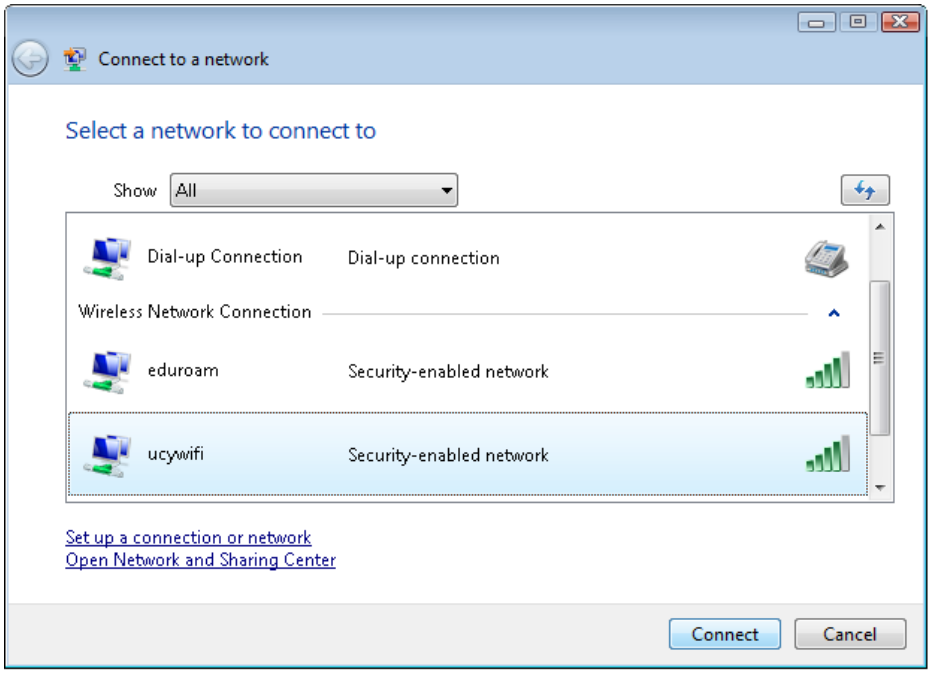
Step 1:

Click on the Wireless Connection icon located on the right side of your computer's taskbar:



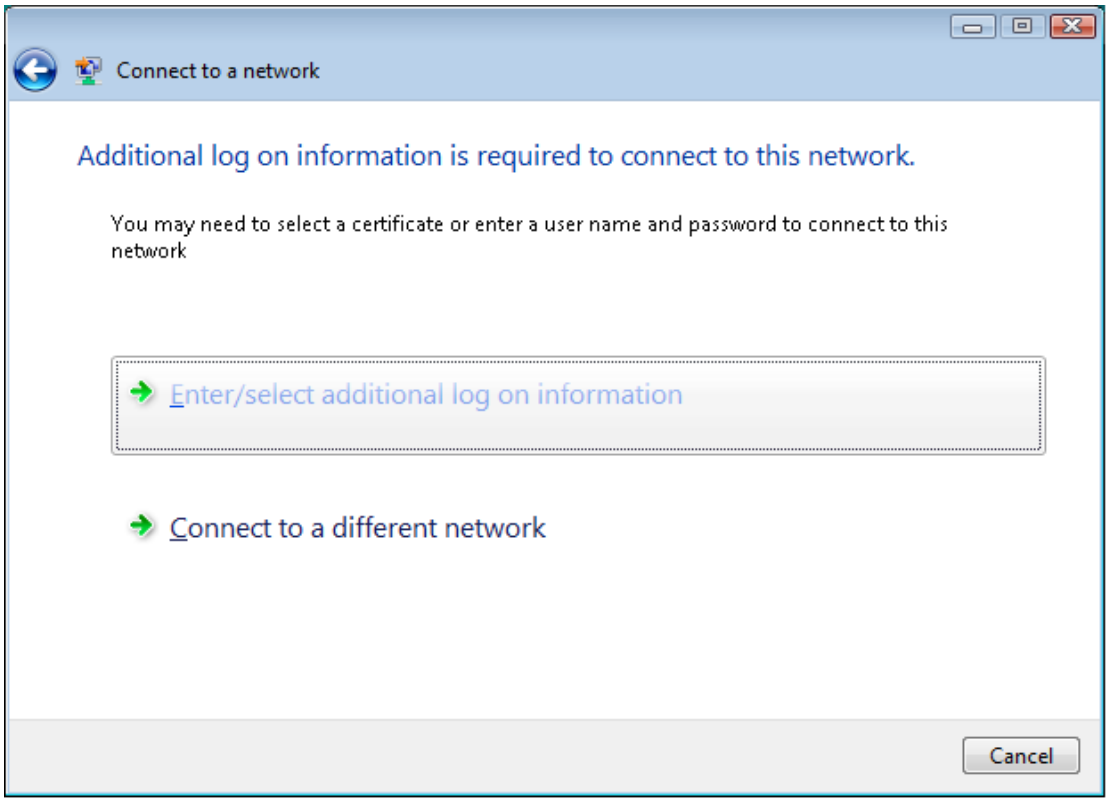
Step 2:

Select the **ucywifi** wireless network from the list of available wireless connections. Click on the **Connect** button**.**



Step 3:

On the new window that will appear, click on **Enter / select additional log on information.**



Connect to a network
Additional log on information is required to connect to this network.
You may need to select a certificate or enter a user name and password to connect to this network
Enter/select additional log on information
Connect to a different network
Cancel

Step 4:

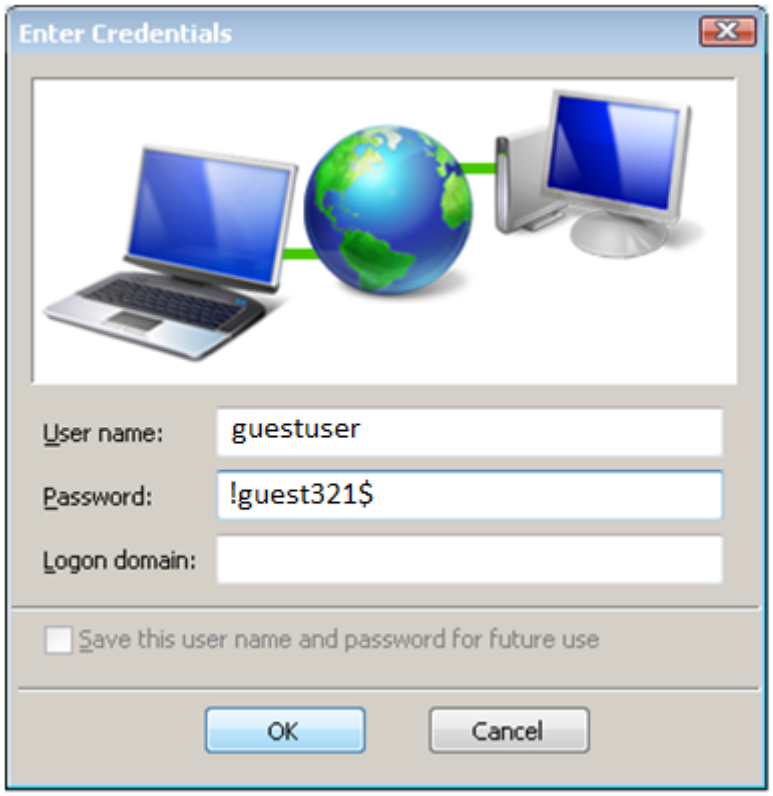
A new window will appear in which you will be prompted to enter your **username** and **password**. The Logon domain should remain empty.

Please use the following credentials to gain access to the internet for the purposes of the current conference:

Username: guestuser

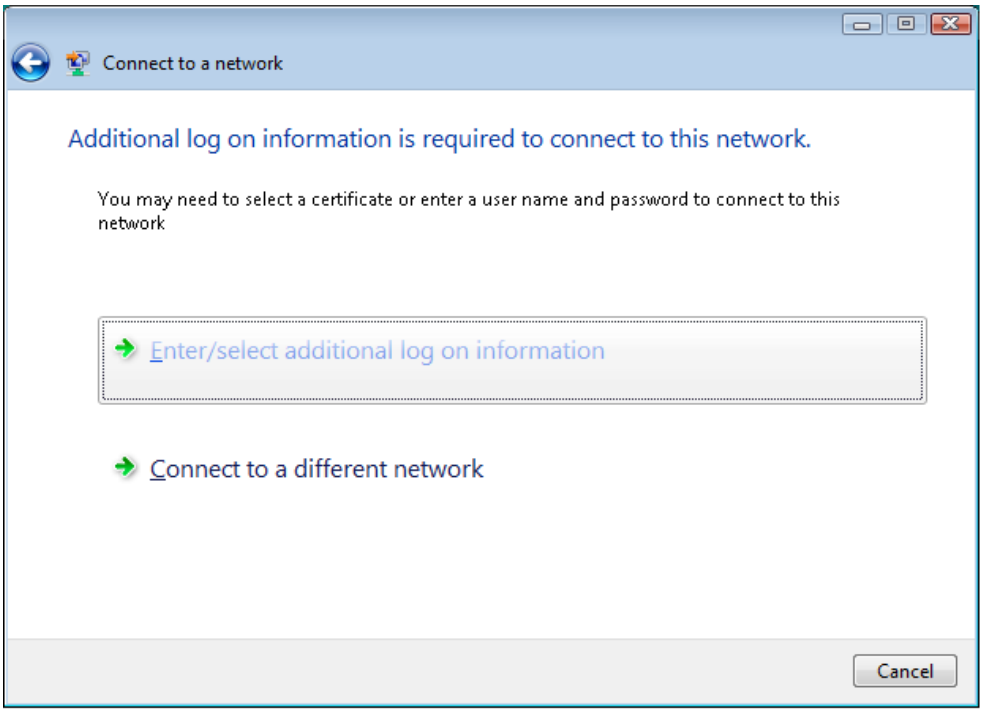
Password: !guest321$

Once you fill in the required information, click **OK**.



Step 5:

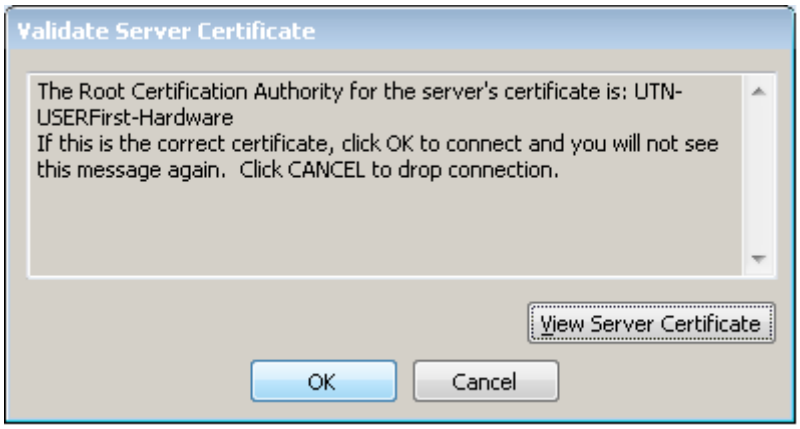
Click on **Enter / select additional log on information**:



Connect to a network
Additional log on information is required to connect to this network.
You may need to select a certificate or enter a user name and password to connect to this network
Enter/select additional log on information
Connect to a different network
Cancel

Step 6:

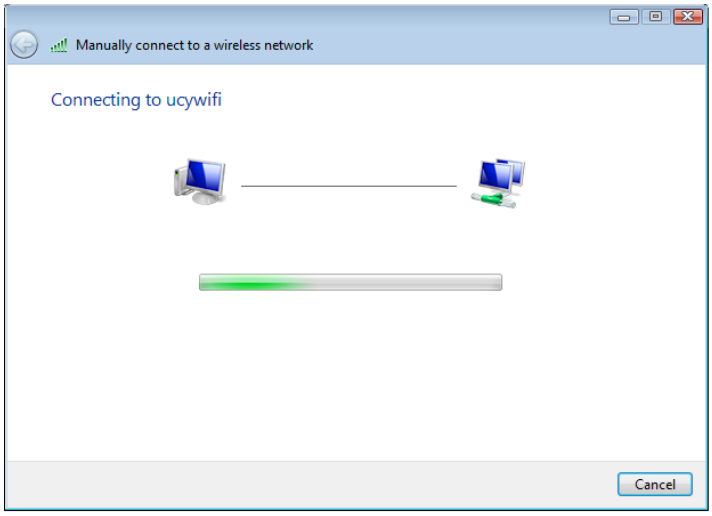
On the "Validate Server Certificate" window that will appear, click **OK**.



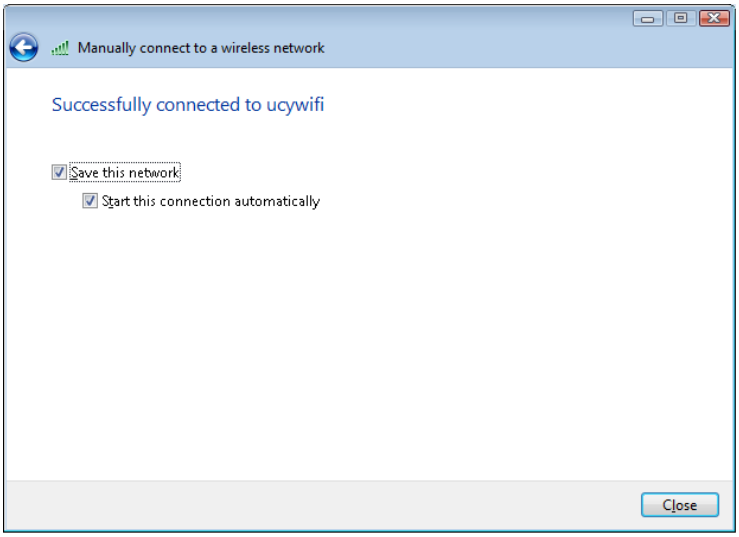
Validate Server Certificate
The Root Certification Authority for the server's certificate is: UTN-USERFirst-Hardware
If this is the correct certificate, click OK to connect and you will not see this message again. Click CANCEL to drop connection.
View Server Certificate
OK
Cancel

Step 7:

The following window will appear for a few seconds on your computer's screen. At this stage you will not have to perform any actions.



Once the connection is established, the following window will appear, which informs you on the successful connection to the ucywifi wireless network. If you wish to save the network and automatically connect to it each time you are in a place where it is available, **check the two tick boxes**, and then click on the **Close** button.



Step 8:

You have successfully connected to ucywifi wireless network. In order to confirm that you are connected to this network and view further details, click on the Wireless Connections icon located on the taskbar. A window resembling the picture below will appear:
